

Ashtray mod. DELFO in stainless steel AISI 430 powder coated polyester.

ASHTRAY MOD. DELFO

Structure

The DELFO ashtray has a cylindrical shape.

The body is made by a 1mm steel sheet modeled with a special mold with an internal sheet for the extinguishing of cigarettes.

The supporting structure is made by a 3mm thick steel sheet and is designed for fixing to a Ø 60mm tube by means of special brackets.

Emptying the ashtray involves opening the lock and removing the glass.

The system for anchoring the ashtray to the supporting structure by means of a stainless steel lock with a universal square key.

All the metal parts that make up the ashtray are in AISI 430 stainless steel which is sandblasted and then painted with polyester powder paints.

Capacity: 1.2 liters total.

All the fixing are in stainless steel
